

PERMANENT MAGNET YOKES PM2000

Gammatec's powerful Permanent Magnet Yoke will certainly lift your inspection capabilities above the mediocre. Offering flexibility, ease of handling and superior lifting power this yoke **never needs recharging** as it is powered by Permanent Magnets.

Flexibility

Using our new Articulating Leg yoke makes working on difficult shapes or awkward angles really easy. The Articulating Leg yoke offers a wide variety of pole spacing with legs that can be locked in place to avoid constant re-adjustment of the foot pieces. Replaceable foot pieces means that your yoke will always work at optimum performance.

Ease of Handling

We have redesigned our yoke to be lightweight with a comfortable, ergonomic grip that will fit virtually all hand sizes and so reduce operator fatigue.

Superior Lifting Power

Our yoke conforms to and surpasses the requirements of ASME V Article 25 SE-709 and ASTM E 709-80, easily lifting weights of 30kg (66lbs).

The Permanent Magnets can operate at temperatures of up to 120°C and, due to their seating within the legs, can withstand severe impact.

Warranty

Our yoke is sold with a 12 month Warranty against defective materials or workmanship.

Technical Data

▪Weight:	2.25kg
▪Power supply:	Permanent Magnet
▪Distance between poles:	85 - 255mm (Adjustable)
